TMOUNT | R&D Center

## TMOUNT, A New Challenge and Beginning!

TMOUNT Co., Ltd. was established in 2015 based on accumulated knowledge in the basic material industry such as wood material, coating material, and high-polymer resin, and experience in developing table tennis products. The company has a professional workforce and the latest facilities for manufacturing table tennis tables and blades. It is recognized for product quality in the co-development of rubber with overseas companies.

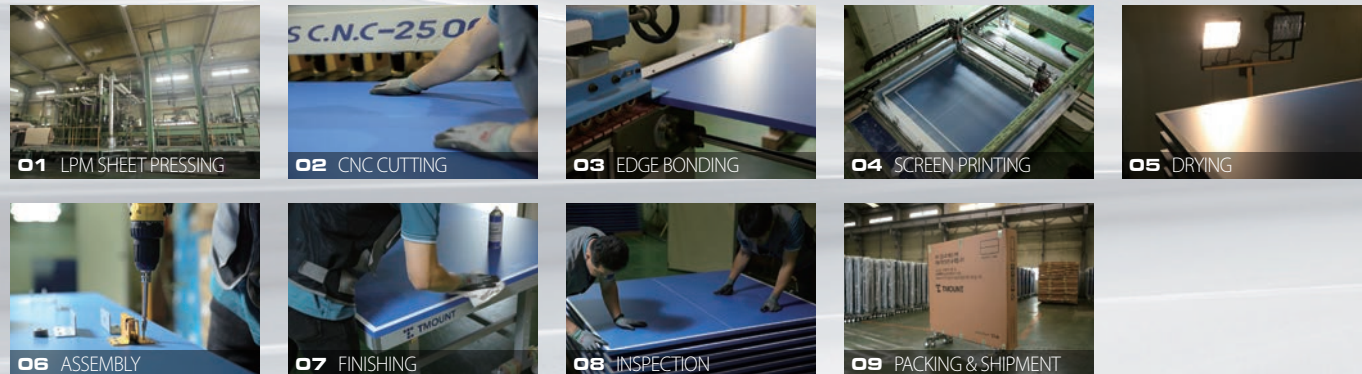

### Main Performance of TMOUNT

TMOUNT products, recognized for quality in China and Japan;  
South Korea's only table tennis top manufacturer

- Registered for a patent, certificate, the LPM coating technique
- ISO 9001 Certificate for Quality Management System
- OEM manufacturing of table tennis tables with Butterfly, the world's largest table tennis brand
- Export contract for table tennis tables with 729, one of the 3 major table tennis brands in China
- Designated as an excellent sports equipment manufacturer by the the Ministry of Culture, Sports and Tourism
- Signed contract with E-mart, the largest retailer in South Korea
- Hosted common booth with the "729" company in the Sports Fair in Shanghai, China and ISPO Sport Fair in Germany
- Certificate of ITTF (International Table Tennis Foundation) for table tennis tables and products
- 2-year delivery of table tennis tables to Latin America Youth Olympics
- Domestic manufacturing and launching for premium blades
- Export contract for table tennis tables with Nittaku, one of the 3 major table tennis brands in Japan
- Delivered 1,000 table tennis tables to the Tianjin Sports event, the largest scale of its kind in China
- Brand launched by Taek-Soo Kim, coach to Mirae Asset Daewoo table tennis team, and coach of the male table tennis national team
- First material brand partner with Swarovski for manufacturing table tennis products

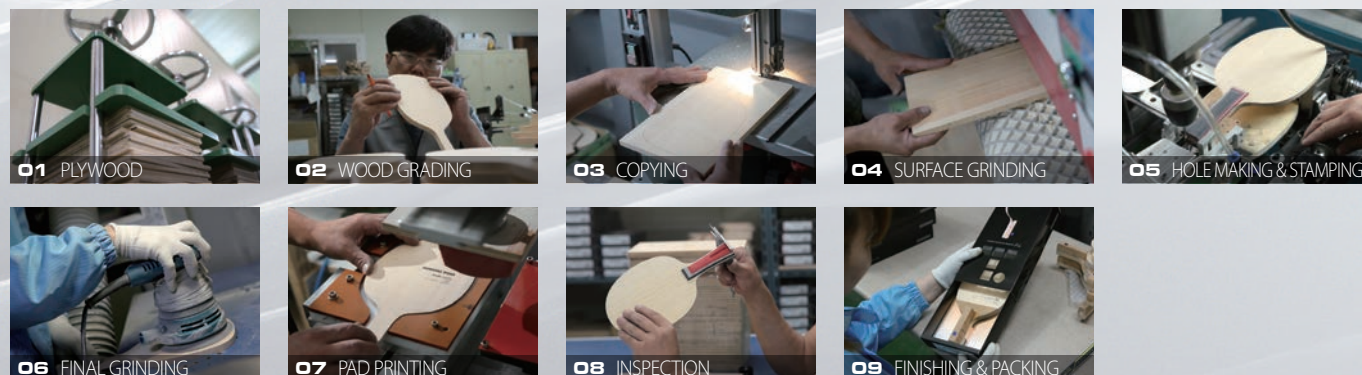

### Major Manufacturing Process of ECOTOP Table Tennis Table

As a solely domestic company specializing in manufacturing table tennis table top, its purpose is to produce high-quality table tennis tables based on an efficient work system.

### Main Manufacturing Process of TCORE Blades

The TCORE blades of TMOUNT prioritizes optimized configuration and balance.  
The company produces high-quality products by undergoing detailed wood selection and test procedures by professional players.

**TCORE MASTER X highly recommended by Taek-soo Kim,  
Korean national Men's team coach**

“It makes a really nasty ball and amazing trajectory”.

**APPROVED & TESTED BY KIM TAEK SOO  
AND PROFESSIONAL PLAYERS**

#### TCORE MASTER X

Color RED, BLACK | Hardness 53° | Thickness 2.1mm | Type Pimple in

Very aggressive rubber with extremely strong spin, catapult effect and clear sounds along with hard sponge. Experience the amazing catapult effect and nasty ball at the moment of impact  
Recommended to players mastering intermediate level skills.

MADE IN CHINA

USD 63.00

TCORE ACE 1 MAXSPEED

Color RED, BLACK | Hardness 50° | Thickness 2.1mm | Type Pimple in

High-tension rubber with excellent ball grip and long distance  
New standard of rubber combining technology of 3 countries: Korea, China, and Germany  
Optimal product available for use by different levels with excellent stability and usability

MADE IN CHINA

USD 49.50

TCORE ACE 1 MAXSPEED

Color RED, BLACK | Hardness 50° | Thickness 2.1mm | Type Pimple in

Aggressive rubber with high-tension top sheet and hard sponge focusing on spin  
New standard of rubber combining technology of 3 countries: Korea, China, and Germany  
Recommended to players mastering intermediate level skills

MADE IN CHINA

USD 49.50

TCORE ACE 2 MAXSPIN

Color RED, BLACK | Hardness 47.5° | Thickness 2.1mm | Type Pimple in

A strong attack rubber with stable and accurate ball control  
New standard of rubber combining technology of 3 countries: Korea, China, and Germany  
Optimal product where various skills can be implemented by reducing attack mistakes with accurate control

MADE IN CHINA

USD 49.50

TCORE ACE Series  
Approved & tested by Kim Taek Soo and professional players

TCORE ACE Series is a new standard rubber that combined the best manufacturing technology from Korea, China and Germany. TLAB(Table Tennis R&D Institute) has analyzed a big data specifically on players' preference, inclination and performance test to achieve a perfect product and a new paradigm. Based on TLAB's big data, we have combined the world-class German elastomer sponge and special coating foaming technology. We achieved a terrific synergy by collaborating with a company that has a long history of manufacturing over 45 years and a cutting-edge double-layer technology.

PRESTO SPIN

Color RED, BLACK | Hardness 47.5° | Thickness 2.1mm | Type Pimple in

The rubber is specially designed for purpose of increasing attacking spinning strong spin and arc down with the high tension topsheet

MADE IN CHINA

N/A

PRESTO SPEED

Color RED, BLACK | Hardness 47.5° | Thickness 2.1mm | Type Pimple in

The rubber is specially designed for purpose of increasing attacking speed fast attacking speed and long arc with the high tension topsheet

MADE IN CHINA

N/A

DERWIND RAYHE

Color RED, BLACK | Hardness 45°, 47.5° | Thickness 2.1mm | Type Pimple in

The new developed large pores sponge is used with BIOS rubber that is suitable for forehand players suitable for the players who have expansive movements and sufficient strength

MADE IN GERMANY

N/A

DERWIND STELLAR

Color RED, BLACK | Hardness 47.5° | Thickness 2.1mm | Type Pimple in

High-tension and excellent control using elastomer sponge from Germany  
Equipped with special forming technology for extremely strong performance with 40+ ABS ball  
High-tension rubber for top-spin attack and various skills with high accuracy

MADE IN GERMANY

USD 49.50

## TMOUNT X Taek-Soo Kim

### Coach Taek-Soo Kim, the world-class legend of all time for penholder

He is the legendary player leading table tennis in Korea with his fantastic footwork, strong forehand, drive, and counter-attack with penholder, remaining as one of the top 10 world-class players of all time for 10 years with top-class performance.

- Current coach of the male table tennis national team; coach of Mirae Asset Daewoo table tennis team
- No. 1 Penholder player in the 20th century
- Textbook demonstration of penholder player
- Miraculous 32-ball rally with Liu Guoliang
- Top 10 world-class
- Grand slam in All-Star Circuit
- National table tennis player for 17 years
- Miraculous footwork play

#### KTS PENHOLDER SERIES,

the premium brand co-developed with coach Taek-Soo Kim, the penholder legend

The KTS penholder series has focused on the selection of material, which is the core element in the blades. Based on refined design and precise processing technology, it will be establishing a new standard for a premium penholder.

#### KISO HINOKI - Selection of wood material is more important.

The core element of the KTS penholder series starts from selection of premium wood material. Kiso Hinoki grows very slowly, which makes its wood quality very solid and thick. As the age is older and there are no knots in Kiso Hinoki, quarter sawing is meticulous and uniform, and bending and deformation is low. By undergoing selection of Hinoki 3 times, Kiso Hinoki is categorized in each grade depending on soft resounding and hitting sensitivity. It is then made into the complete product by undergoing final inspection and approval by coach Taek-Soo Kim.

## KTS PENHOLDER SERIES

the premium brand co-developed with coach Taek-Soo Kim, the penholder legend

- Collaboration between coach Taek-Soo Kim, a legendary penholder player, and TMOUNT, a company recognized for top quality
- Commercialization after final approval by coach Taek-Soo Kim
- Penholder power fueled by premium mono-ply, 10.5mm thickness Kiso Hinoki
- Kiso Hinoki performance is maximized with selective wood and 3D touch precision processing
- Guaranteed reliable manufacturing management and excellent quality based on manufacturing made in Korea

#### KIM TAEK SOO THE LIMITED EDITION

## Approved & tested by KTS and Professional players

### KTS SHAKEHAND SERIES

The KTS Exclusive & Premium series offers the professional blades made using TMOUNT's outstanding processing technology and manufacturing system. Coach Taek-Soo Kim has undergone numerous test procedures to find the right configuration and balance to maximize blades performance.

#### Features of the KTS Shakehand Series

- Uses plywood tested by coach Taek-Soo Kim
- Outstanding symmetry, leveling, and center of gravity using a cutting-edge processing device
- Outstanding durability by processing specially developed surface nano-coating
- Excellent quality of manufacturing system

#### KTS BLADES Purchase Information

Order online at [ttmount.com](http://ttmount.com)

- TFACTORY KOREA products begin manufacturing at the time of order receipt, so it may take up to 30 days.
- TFACTORY CHINA products start delivery immediately at the time of payment.

#### KTS CORE ALC

MADE IN KOREA USD 155.00

Textured high-elasticity carbon fiber material with weighty hit sensitivity and high repulsive force

Special material featuring outstanding speed and soft hitting sensitivity by texturizing aramid fiber and high-elasticity carbon fiber

Core ZLC special material providing high performance along with top quality elasticity and intensity while having light weight compared to carbon fiber

Core ALC special material featuring accurate control and outstanding stability by texturizing arylate and high-elasticity carbon fiber

## STARDUST BLADE SERIES

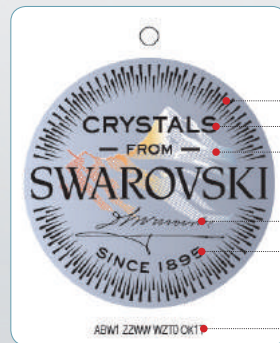

TMOUNT Co., Ltd. is the first material brand partner with SWAROVSKI.

Cherish the brand value and dignity based on design products made using 100% genuine SWAROVSKI crystal.

### Check for the official mark seal guaranteeing use of genuine SWAROVSKI crystal.

After its establishment in 1895, the crystal processing technology by Daniel Swarovski has contributed to today's highest quality crystal. His relentless passion for innovation and design has contributed to making SWAROVSKI the world's first-class jewelry brand today. Today, Swarovski is succeeding its heritage, providing special daily styles for customers around the world.

It has an online certification program provided by SWAROVSKI to material brand partners in the world to certify genuine products. Enter the 16-digit code at [crystals-from-swarovski.com](http://crystals-from-swarovski.com) to verify product authenticity.

- "Crown" graphic
- Material brand: Crystals from Swarovski
- Tyrolean Mountain hologram
- Signature of founder: Daniel Swarovski
- Founding year
- Track system using the unique identifying code composed of combination of alphabet and numbers

## STARDUST BLADE SERIES

Differentiated features; 5 merits for selection

- Made with 100% genuine SWAROVSKI crystal
- Plywood material tested by coach Taek-Soo Kim
- 3D modular grip type (Patent Pending 10-2020-0063410)
- Outstanding symmetry, flatness, and balance of weight using a cutting-edge processing device
- Guaranteed excellent quality of manufacturing system

## STARDUST GIFT SELECTION

### Blade gift selection completed using attractive SWAROVSKI crystal

Deliver your precious feelings with a sensible special gift for your beloved partner, family, or friend.

The STARDUST gift selection is sent by packing in a high-class signature package.
